

Table with 10 columns and 40 rows. The top row is highlighted. The table contains numerical data points represented by dots. The rows show a complex, non-linear relationship between the columns. The first column has values ranging from approximately 0 to 1. The second column has values ranging from approximately 0 to 0.5. The third column has values ranging from approximately 0 to 0.8. The fourth column has values ranging from approximately 0 to 0.5. The fifth column has values ranging from approximately 0 to 0.5. The sixth column has values ranging from approximately 0 to 0.5. The seventh column has values ranging from approximately 0 to 0.5. The eighth column has values ranging from approximately 0 to 0.5. The ninth column has values ranging from approximately 0 to 0.5. The tenth column has values ranging from approximately 0 to 0.5.
